(54) REPRODUCING DEVICE AND METHOD, RECORDING MEDIUM, AND PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a reproducing device and method that quickly moves a reproduction point by a prescribed period ΔT .

SOLUTION: In a step S21, video data reproduction information of a present VOB (Video Object Unit) is acquired. In a step S22, whether or not a VOB before ΔT second belongs to the same cell as that of the present VOB is discriminated. In a step S23, whether or not video data exist in the VOB before ΔT second is discriminated. When the discrimination indicates that the video data exist in the VOB before ΔT second, it is determined that the information recorded as an address of the VOB before ΔT second is discriminated to be effective. In a step S24, the VOB before ΔT second is decided as a search destination.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
